Design for skiftende regnhændelser

København 2. juli 2011. En 1000-års skybrudshændelse

*400.000 mennesker dør årlig
av luftforurensning i Europa*

(Kilde: European Court of Auditors)

A person wearing a red jacket and a dark hood is walking away from the camera on a cobblestone-paved street. To the right, there is a wall covered in graffiti. The scene is captured in a high-angle, slightly desaturated photograph.

Psykiske lidelser bliver i fremtiden en øget trussel for folkesundheden. Psykiske lidelser påvirker i dag 450 millioner mennesker på verdensplan.

Danske forskere har studeret 1 mio børn og konkluderet at børn, der vokser op omgivet af natur, har reduceret deres risiko for psykiske lidelser med 55 procent.

Rethinking the public realm

An architectural rendering of a city block renovation project. The image shows a central intersection with a new pedestrian-friendly street layout. The design features a central green corridor with trees and a water basin. The surrounding blocks are filled with green spaces, trees, and water basins, illustrating a shift from asphalt to green infrastructure. The overall aesthetic is clean and modern, with a focus on sustainability and public space.

600 trees

2/3 asphalt area converted to planting area

+ 500 m³ meter of water basin

New traffic flow

Skt Kjelds Kvarter hovedgreb

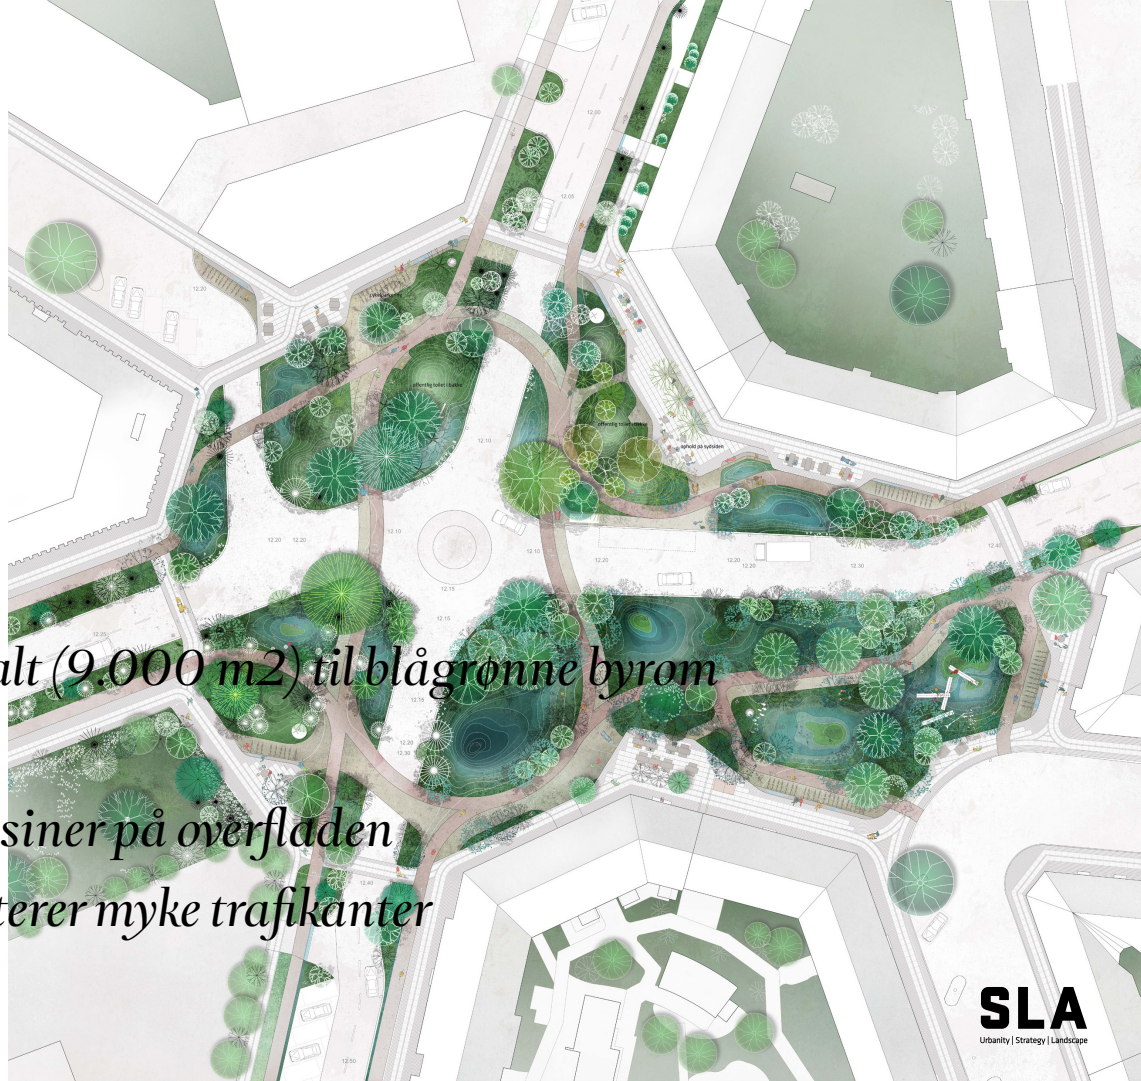

Vi omdanner 2/3 av områdets asfalt (9.000 m²) til blågrønne byrom

Vi planter 586 nye trær

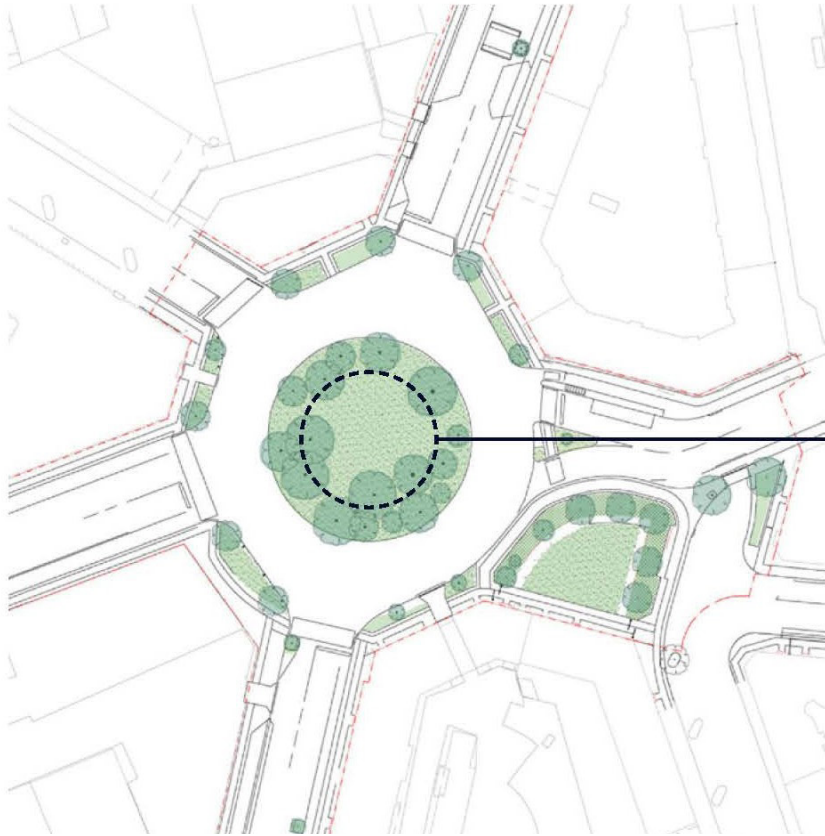

Vi skaper + 500 m³ regnvandsbassiner på overfladen

Vi skaper nyt trafikkflow der prioriterer myke trafikkanter

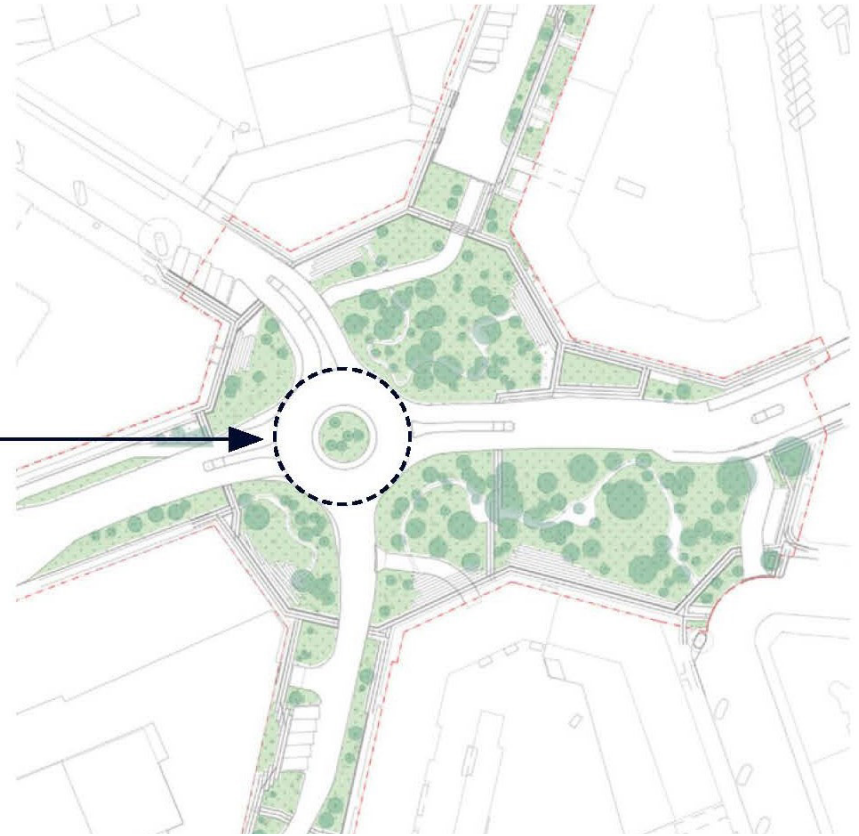

Vi bevarer alle parkeringspladser

Fra rundkjøring til byrom + mye mer bynatur

Naboskab og nabolag

#ViralBynatur

A photograph of a person walking on a series of concrete steps that are partially covered by lush green grass and small flowers. The person is wearing blue jeans and brown shoes. In the background, there are trees, a road, and a building with a sign that says "DIGNABENT". The overall scene is bright and sunny, suggesting a pleasant urban environment.
